Shoes & Socks
Tips for choosing and using them

Shoes
What to look for

- Extended shoe tongue for ease of donning over the braced foot
- Shoe ties or straps that secure snugly over the instep
- Removable insole that can be taken out to increase the volume available for the brace
- High profile for good heel and ankle support
- Wide toe box for extra space to comfortably accommodate the brace

Tip for boots and high-tops
We recommend styles with a side or rear zipper, or some other wide-opening feature.

Brands to consider:

- Retail shoes
  Stores offering a wide shoe selection often carry styles that are functionally appropriate, stylish, and less expensive than orthopedic shoes.
  
  | Adidas       | New Balance |
  | BILLY        | Nike        |
  | Champion     | PLAE        |
  | Converse     | See Kai Run |
  | DCS          | Skechers    |
  | Dinosoles    | Stride Rite |
  | Keen         | Tsukihoshi  |
  | Merrell      | Vans        |

- Orthopedic specialty shoes
  These shoe brands are designed specifically to accommodate orthoses:
  
  - Answer2
  - Hatchbacks
  - Markell Shoe Company

Shopping

- You may want to shop without your child. Take the brace with you and try fitting it into the shoe. You can often buy shoes, take them home for a relaxed fitting session, and return or exchange them if needed.
- For online shopping, consider ordering several brands/sizes, then return the shoes that don’t work out.
- Once you find a brand you like, go to that specific brand again for a dependable fit.

Trying the shoe on

- Remove the insole layer that comes in the shoe.
- Find the smallest shoe that can hold the brace. You may have to wiggle and push the brace into the shoe before the heel drops in. Use a fairly aggressive push to get the brace down into the toe box. This extra work means the shoe will be only slightly longer than normal. If the brace slides into the shoe too easily, the shoe may be too large and your child may trip over the toes.
- A shoe horn helps get the braced foot into the shoe.
Shoes continued

To help the fit
Consider slightly altering the shoe, especially in canvas shoes with a sewn, overlapped toe box.

- Try snipping a few threads that hold the toe box closed around the attached end of the tongue.
- Look at the shoe as you insert the brace and foot to see where the material stretches as it holds the brace. A minor cut at this point can provide more room.

Only one brace?
If your child wears a brace on only one foot, you and your practitioner can discuss the following options:

- The brace will slightly increase the length (height) of the leg it’s on. To maintain even leg height:
  - If the shoes come with a removable flat insole, remove it from the braced side, flip it over, and add it to the un-braced side.
  - Put an orthotic into the un-braced foot’s shoe. Our HotDog and PattiBob shoe inserts are ideal for this.
- For a bulkier brace, you may need two different shoe sizes—one for the un-braced foot and a larger size for the braced foot.
- For more room, consider altering the braced foot’s toe box as described above.

Socks

What to look for
For optimal comfort, you’ll want to choose a sock with the following characteristics:

- Fits smoothly against the skin (no bunching or folding)
- Wicks perspiration away from the skin
- Is seamless
- Resists wrinkling
- Extra-long to provide full coverage

Knit-Rite® SmartKnit® Socks
Knit-Rite SmartKnit socks offer all the features above, and are specifically designed to wear with SMO, AFO, and KAFO braces. You can purchase SmartKnit socks on our website: cascadeshop.com/socks.

- Sizing
  Available in infant, child, or adult sizes. Infant and child sizes come in a variety of colors.

- AFO sock styles
  Choose a standard sock design or a toe sock with a separate space for the 1st toe.
